Office Action Summary

Serial Number 08/862039

Art Unit 3642

1. Applicant is reminded of the continuing obligation under 37 CFR 1.56 to timely apprise the Office of any litigation information, or other prior or concurrent proceeding, involving Patent No. 5,418,537, which is material to patentability of the claims under consideration in this reissue application. This obligation rests with each individual associated with the filing and prosecution of this application for reissue. See MPEP §§ 1404, 1442.01 and 1442.04.

2. An offer to surrender patent No. 5,418,537 is acknowledged.

✓ 3. The reissue declaration filed July 23, 1988 is defective since it has not been signed.

✓ 4. The reissue declaration filed with this application is defective because it fails to contain a statement that all errors which are being corrected in the reissue application up to the time of filing of the declaration arose without any deceptive intention on the part of the applicant. See 37 CFR 1.175 and MPEP § 1414.

See
MPEP
1444
OK

5. Claims 28-49 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the declaration is set forth in the discussion above in this Office action.

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

7. Claims 28-34, 36, 38-40, 42, and 44-49, are rejected under 35 U.S.C. 102(e) as being anticipated by Song (5,208,756).

Song teaches the claimed method and apparatus for disclosing the present location of a vehicle including: means (19) for performing in-vehicle processing of signals to obtain a fix of vehicle location, paging request responder means (28 and column 7, lines 43-68) for receiving a paging request, communication device (23, 25, and column 10, lines 38-49) "separate" from the paging request responder (28) for transmitting the fix to a designated service center (17), a plurality of satellites (column 1, lines 28-38), using a cellular telephone (Abstract), and notifying police

(column 1, lines 23-27, and column 2, lines 13-17). The communication device (23 and 25) is "separate" from the paging request responder (28), see Figure 2.

8. Claims 35, 37, 41, and 43, are rejected under 35 U.S.C. 103(a) as being unpatentable over Song (5,208,756) in view of Darnell et al (5,043,736) .

To increase the accuracy of the location system of Song, obviously the location unit 19 of Song can be the GPS type taught by Darnell et al.

9. Claims 1-27 are allowed.

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be

calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
